SUBJECT INDEX

The subject index conforms to the categories established in The OR/MS Index, 1952–1976, 1976–1981 and 1982–1987. The 1952–1976 cumulative index was compiled by Kneale T. Marshall and F. Russell Richards, the 1976–1981 cumulative index was compiled by Jon W. Tolle and Richard E. Stone, and the 1982–1987 cumulative index was compiled by Jon W. Tolle. The indices were published in 1978, 1983 and 1988 by the Institute of Management Sciences and the Operations Research Society of America.

A

Accounting
Avenhaus, R., inspector leadership game, 341–348
Agriculture
Qingzhen, Z., optimization of production structure, 194–205
Analysis of algorithms
Anily, S., worst case bounds, 233–243
Lofgren, C. B., complexity, bounds, and heuristic performance, 992–1004
Artificial intelligence
Burd, S. D., artificial intelligence, 366–377

C

Communications
Doverspike, R. D., telecommunications transmission networks, 925–944
Computers/computer science
Boxma, O. J., master-slave architecture, 1005–1017
Colin, J. Y., task allocation on distributed memory processors, 680–684
Hochbaum, D. S., strongly polynomial algorithms, 648–653

D

Decision analysis
Avenhaus, R., data verification occurring in accounting, 341–348
Morrison, D. G., theory, 519–523
Yu, P. L., high-stake decision making and conflict resolution, 869–876
Decision analysis, applications
Corner, J. L., survey of applications, 206–219
Keefer, D. L., allocation of capital in bidding for leases, 28–41
Dynamic programming
Lovejoy, W. S., partially observed Markov decision processes, 163–175
Dynamic programming, applications
Tamaki, M., the secretary problem; the marriage problem, 274–284
Dynamic programming, deterministic
Bannister, C. H., rapid, exact dynamic programming, 220–232
Hall, N. G., earliness and lateness costs, 836–846
Dynamic programming, Markov
Lovejoy, W. S., Bayesian programming and infinite state Markov models, 163–175
Dynamic programming/optimal control
Jiang, J., stochastic, continuous time, 970–978
Özekici, S., semi-Markov inspection scheduling model, 261–273

E

Economics
Cyert, R. M., addresses, 5–8
Nagurney, A., solution of equilibrium problems, 9–12
Engineering
Thomas, L. D., systems optimization, 677–684

F

Facilities/equipment planning
Doverspike, R. D., capacity expansion of telecommunications equipment, 925–944
Kwun, Y. H., industrial cogeneration and conventional electricity systems, 798–806
Labbé, M., competitive location, 749–756
Shulman, A., multiperiod facilties location planning, capacity expansion, 423–436
Facilities/equipment planning, continuous location
Lefebvre, O., coincidence properties in minisum multifacility location, 437–442
Facilities/equipment planning, location
Labbé, M., minisum facility location model, 961–969
Forecasting
Morrison, D. G., applications, 519–523

G

Games/group decisions
Kolstad, C. D., noncooperative and differential, 739–748
Games/group decisions, bidding/auctions
Keefer, D. L., bidding systems for offshore oil and gas leases, 28–41
Games/group decisions, gambling
Thomas, L. C., active sonar search, 415–422
Games/group decisions, noncooperative
Avenhaus, R., arms control and others, is formulated as, 341–348
Labbé, M., two-stage games, 749–756
Government

Lustig, I. J., techniques for stochastic linear programs, 757–770
Programming, linear, algorithms
Adler, I., strong polynomality, 955–960
Klein, R. S., minimax algorithm for substitutable resources, 285–295
Programming, linear, applications
Kent, B., linear programming and forest planning, 13–27
Programming, linear, integer
Rogers, D. F., aggregation/disaggregation and surrogate programming, 553–582
Programming, nonlinear applications
Kraay, D., heuristic for large-scale, mixed integer convex programs, 82–99
Programming, nonlinear convex
Weintraub, A., chance constrained programming, 776–785
Programming, quadratic
Zipkin, P. H., application to production scheduling, 56–63

Programming, stochastic
Lustig, I. J., solution by interior point methods, 757–770

Q

Queues
Anily, S., structured set partitioning problems; algorithms, 130–149
Boxma, O. J., fluid flow approximations, 1005–1017
Glasserman, P., sample path analysis and optimization, 724–738
Ittimakin, P., random number of servers; waiting time distribution, 633–638
Wein, L. M., Brownian models of network scheduling problems, 322–340
Wolff, R. W., effect of arrival process on delay moments; regeneration, 771–775
Queues, approximations
Fleming, P. J., interpolation approximations, 251–260
Goldberg, J., nonlinear equation approximation models, 903–916
Queues, limit theorems
Fleming, P. J., light traffic and heavy traffic, 251–260
Queues, Markovian
Van Dijk, N. M., truncations, 1018–1026
Queues, multichannel Markovian
Green, L., effects of nonstationarity, 502–511
Queues, networks
Adler, I., generalized, exploiting special structure, 955–960
Queues, nonstationary
Green, L., behavior as a function of nonstationarity, 502–511
Queues, optimization
Balas, E., subgradient optimization with facet defining cutting planes, 150–161
Queues, simulation
McClain, J. O., finite storage capacity in tandem queues, 857–860
Queues, tandem
McClain, J. O., finite storage capacity allocation, 857–860
Van Dijk, N. M., finite approximations, 1018–1026

R

Reliability
Prasad, V. R., optimal allocation of components in reliability systems, 407–414
Prékopa, A., availability analysis in power systems, 119–129

S

Search and surveillance
Thomas, L. C., active sonar search, 415–422
Simulation
Fossett, C. A., assessment of models, 710–723
Glasserman, P., gradient estimation techniques, 724–738
Jacobson, S. H., design of experiments; factor screening; frequency domain methods, 917–924
Simulation, applications
Johnson, D. S., optimization by simulated annealing, 378–406
Simulation, random variable generation
Boender, C. G. E., generating aymptotically uniform points on the boundary of a polytope, 945–954
Simulation, statistical analysis
Yang, W., variance reduction, 583–591
Statistics
Keefer, D. L., statistical models for winning in offshore lease bidding, 28–41,
Yang, W., multiple comparisons, 583–591
Statistics, cluster analysis
Rogers, D. F., aggregation process, 553–582
Thomas, L. D., variance methods, 677–679

T

Transportation
Bertsimas, D. J., vehicle routing, 601–615
Kraay, D., control of freight railroad traffic, 82–99
Laporte, G., vehicle routing, 616–622
Nagurney, A., formulation and solution of multimodal problems, 9–12
Transportation, vehicle routing
Noon, C. E., routing with alternatives, 623–632

U

Utility/preferences, applications
Corner, J. L., survey of applications, 206–219
Utility/preference, multiattribute
Sounderpandian, J., maximin and minisum value functions, 592–600
Utility/preference, value theory
Sounderpandian, J., axiomatic derivation of value functions, 592–600

V

Vehicle routing
Altinkemer, K., heuristics for vehicle routing, 456–469

CONTENTS, VOLUME 39: 1991

Number 1 January–February 1991

IN THIS ISSUE 2

OR FORUM

Knowledge and Economic Development 5
Richard M. Cyert

Equilibrium Modeling, Analysis and Computation: The Contributions of Stella Dafermos 9
Anna Nagurney

OR PRACTICE

Natural Resource Land Management Planning Using Large-Scale Linear Programs: The USDA Forest Service Experience With FORPLAN 13
Brian Kent, B. Bruce Bare, Richard C. Field and Gordon A. Bradley

Development and Use of a Modeling System to Aid a Major Oil Company in Allocating Bidding Capital 28
Donald L. Keefer, F. Beckley Smith, Jr., and Harry B. Back

ARTICLES

The Line Segmentation Problem 42
Reza H. Ahmadi and Hirofumi Matsuo

Computing Optimal Lot Sizes in the Economic Lot Scheduling Problem 56
Paul H. Zipkin

Weighted-Tardiness Scheduling on Parallel Machines With Proportional Weights 64
Esther M. Arkin and Robin O. Roundy

Optimal Pacing of Trains in Freight Railroads: Model Formulation and Solution 82
David Kraay, Patrick T. Harker and Bintong Chen

Finite Dominating Sets for Network Location Problems 100
J. N. Hooker, R. S. Garfinkel and C. K. Chen

On the Existence of a Feasible Flow in a Stochastic Transportation Network 119
András Prékopa and Endre Boros

Structured Partitioning Problems 130
S. Anily and A. Federgruen

An Algorithm for the Three-Index Assignment Problem 150
Egon Balas and Matthew J. Saltzman

Computationally Feasible Bounds for Partially Observed Markov Decision Processes 162
William S. Lovejoy

CONTRIBUTORS 176

Number 2 March–April 1991

IN THIS ISSUE 180

OR FORUM

An Existence Theorem for OR/MS 183
John A. White

OR PRACTICE

The Application of Operations Research in the Optimization of Agricultural Production 194
Zhao Qingzhen, Wang Changyu, Zhang Zhimin, Zhang Yunxiang and Wang Chuanjiang

Decision Analysis Applications in the Operations Research Literature, 1970–1989 206
James L. Corner and Craig W. Kirkwood

ARTICLES

A Rapid Method for Optimization of Linear Systems With Storage 220
C. H. Bannister and R. J. Kaye

Multi-Item Replenishment and Storage Problem (MIRSP): Heuristics and Bounds 233
Shoshana Anily

Some Facets for an Assignment Problem With Side Constraints 244
Ronny Aboudi and George L. Nemhauser

Interpolation Approximations of Sojourn Time Distributions 251
Philip J. Fleming and Burton Simon

Optimal Scheduling of Inspections: A Delayed Markov Model With False Positives and Negatives 261
Suleyman Özekici and Stanley R. Pliska

A Secretary Problem With Uncertain Employment and Best Choice of Available Candidates 274
Mitsushi Tamaki

Minimax Resource Allocation With Tree Structured Substitutable Resources 285
Rachelle S. Klein and Hanan Luss

Simultaneous Product-Mix Planning, Lot Sizing and Scheduling at Bottleneck Facilities 296
Sin Hoon Hum and Rakesh K. Sarin

An $(S-1, S)$ Inventory System With Emergency Orders 308
Kamran Moinzadeh and Charles P. Schmidt

Brownian Networks With Discretionary Routing 322
Lawrence M. Wein

Optimal Data Verification Tests 341
R. Avenhaus, H. P. Battenberg and B. J. Falkowski

CONTRIBUTORS 349

Number 3 May–June 1991

IN THIS ISSUE 352

OR FORUM

Six (Or So) Things You Can Do With a Bad Model 355
James S. Hodges

OR PRACTICE

Decision Support for Supercomputer Acquisition 366
Stephen D. Burd and Suleiman K. Kassicieh

ARTICLES

Optimization by Simulated Annealing: An Experimental Evaluation; Part II, Graph Coloring and Number Partitioning 378
David S. Johnson, Cecilia R. Aragon, Lyle A. McGeoch and Catherine Schevon

Optimal Assignment of Components to Parallel-Series and Series-Parallel Systems 407
V. Rajendra Prasad, K. P. K. Nair and Y. P. Aneja

Dynamic Search Games 415
Lyn C. Thomas and Alan R. Washburn

An Algorithm for Solving Dynamic Capacitated Plant Location Problems With Discrete Expansion Sizes 423
Alexander Shulman

Sufficient Conditions for Coincidence in Minisum Multifacility Location Problems With a General Metric 437
O. Lefebvre, C. Michelot and F. Plastria

Capacitated Two-Stage Multi-Item Production/Inventory Model With Joint Setup Costs 443
S. Anily and A. Federgruen

Parallel Savings Based Heuristics for the Delivery Problem 456
Kemal Altinkemer and Bezalel Gavish

Matchup Scheduling With Multiple Resources, Release Dates and Disruptions 470
James C. Bean, John R. Birge, John Mittenthal and Charles E. Noon

Off-Day Scheduling With Hierarchical Worker Categories 484
Hamilton Emmons and Richard N. Burns

Optimal Manufacturing of a Two Product Mix 496
Offer Kella

Some Effects of Nonstationarity on Multiserver Markovian Queueing Systems 502
Linda Green, Peter Kolesar and Anthony Svoronos

TECHNICAL NOTES

Multi-Echelon Assembly Systems With Nonstationary Demands: Heuristics and Worst Case Performance Bounds 512
Dev Joneja

How Many Forecasters Do You Really Have? Mahalanobis Provides the Intuition for the Surprising Clemen and Winkler Result 519
Donald G. Morrison and David C. Schmittlein

CONTRIBUTORS 524
